K05 100x120

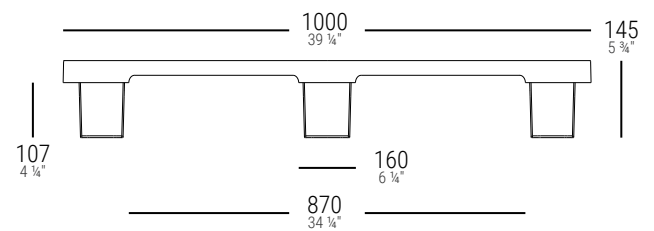

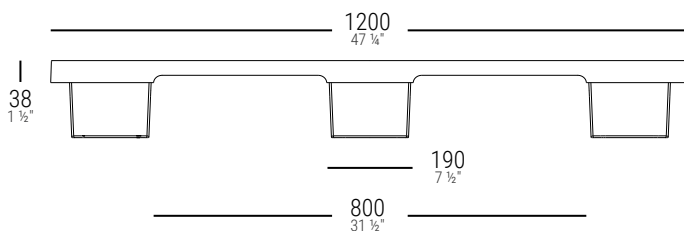

The KUBOOX® plastic pallet with non-slip edging is specially designed for worldwide shipping. Pallet available in three sizes, made of recycled polypropylene, it does not need any phytosanitary treatment and certification for EXTRA-EU countries. It is not affected by moisture problems and maintains a higher level of hygiene than wood.

Reduced weight and maximum solidity thanks to the careful design, which also allows for excellent stackability, significantly reducing storage space and at the same time allowing easy stacking. For larger versions, in addition to the RFID accessory, crossbars can be attached to provide greater strength and load-bearing capacity.

STACKABILITY

Maximum stackability: m 2,5 = 52 pcs. Kg 375
Pallet for transport: 1352 pcs.

BORDER: mm 5

ACCESSORIES: RFID
